

Placement of Meta AI Suggestions in WhatsApp

Problem:

Meta AI suggestions in WhatsApp are placed right above the Archived Chats option. When users try to access their archived chats, they often accidentally tap on these suggestions instead. This action opens a chat with Meta AI, which automatically sends the clicked suggestion and starts responding, leading to unexpected and annoying interruptions.

Solution:

Move the Meta AI suggestions to a less prominent location, such as below the chat list or in a separate tab. Alternatively, these suggestions could be integrated directly within the Meta AI chat or made available only when a user specifically requests them. This would keep the suggestions accessible without interfering with the main chat functions and ensure they are seen only when the user wants to interact with the

Benefits:

1. Fewer Mistakes: Less chance of tapping on suggestions by accident.
2. Better Experience: Easier to navigate through chats without interruptions.
3. Voluntary Use: Users can choose to view suggestions when they want.
4. Cleaner Interface: Less clutter makes the app look neater.
5. Personalization: Users can customize their interface more easily.
